Dodatne informacije:

Tekst oglasa:

Subsystem Tecnology acoustic (SST) The absorption range is between: 60 Hz - 400 Hz depends on its diameter Absorption material density 100kg / m3 Professional design and workmanship, tested in acoustically treated listening spaces TUBE TRAP dimension in diameter 35 cm is 1070 x 350mm (107x35 cm) correspond to the price of 489 Euro TUBE TRAP is used to improve the acoustics of space such as: - HOME CINEMA - HOME MUSIC LISTENING ROOMS - RECORDING STUDIO - Office - HIFI listening rooms - DECORATIVE FUNCTION IN SPACE TUBE TRAPS cylinder shape gives the structural rigidity and internal air cavity necessary to absorb sounds in the low frequency range of 60-400 Hz. Their diameter determines how deep and in what range of bass they perform their absorption function. Because TubeTrap absorbs unwanted sounds, and their cylindrical shape makes them ideal for the function for which they are intended, and give maximum results in the space in which they are placed. This type of Tube Trap is equipped with an adjustable Treble Balance Control surface (SST technology), with the built-in Treble diffuser that corrects the clarity of the sound in space. More details about the product you'll find at the site: ssteu.com TUBE TRAPS save space and best reduce unwanted sound effects that distort the sound image of the space. By applying them in the desired space, you achieve clarity, detail and transparency of sound. For any questions feel free to contact me directly: delicatesound10@gmail.com Thank you
